Hopkinsville, KY 42241

RE: Christian County Water District
Phase VII System Extension Project
Project Completions

Dear Ash:

As of March 5, 2009, Bobby Luttrell & Sons, LLC substantially completed work on the original work of the Contract for the referenced project. The completion date is in conjunction with the final successful disinfection (KY Highway 117) of the new water lines, placement into service, pressure testing, and completion of rough cleanup. Based upon our firm's observations of the work, we believe that the work was performed in accordance with the approved plans and specifications for the project. Therefore, the warranty period for the original waterlines will run for a 12-month period ending on or near March 5, 2010.

As of September 18, 2009, Bobby Luttrell & Sons, LLC substantially completed work on the added waterline work associated with miscellaneous change orders included in the Contract for the referenced project. The completion date is in conjunction with the final successful disinfection (Shepherd Road) of the added water lines, placement into service, pressure testing, and completion of rough cleanup. Based upon our firm's observations of the work, we believe that the work was performed in accordance with the approved plans and specifications for the project. Therefore, the warranty period for the added waterlines will run for a 12-month period ending on or near September 18, 2010.

Hence, we recommend acceptance of the project by the Christian County Water District.

Sincerely,

MCGHEE ENGINEERING, INC.

Chris Wilcutt, PE
Design Engineer
